## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claim 1-18 and 21-46 are allowed.
2. The present invention is directed to a method for defining a path through a DSL or ADSL network using the topology of the overall network and the service order for the provision of the communication service. The prior arts in the record fail to teach or make obvious to a method comprising both DSLAM and MR within a structure of the claim. These features are claimed in the independent claims 2, 26, 27, 45, 46 and render them allowable.
